(54) Title: INTELLIGENT PERIPHERAL FOR SPEECH RECOGNITION IN NETWORKS

(57) Abstract: A telecommunication network with an intelligent peripheral that is provided with a processor and a memory, as well as speech recognition functionality. The memory stores a list of VPN-addresses of at least one of a set of persons, personal functions, specific terminals and services. The telecommunication network also has a switch and a network apparatus. The intelligent peripheral provides for speed recognition and is provided as an add-on in the network.
